About This Game

THE HARDEST MURDER TO SOLVE IS YOUR OWN.

Murdered: Soul Suspect is a supernatural detective thriller which challenges players to solve possibly the hardest case of all... their own murder.

When Ronan O'Connor, a detective with a chequered past, gets caught up in a violent burglary, his life is brought to an untimely end by a brutal and relentless killer.

Shocked to find himself in the afterlife, his only escape from the limbo world of 'Dusk' is to uncover the truth behind his killer, track him down and bring him to justice using his detective instinct and new-found supernatural abilities.

As Ronan, you have the freedom to explore the modern-day town of Salem: its New England-style wooden houses, narrow streets, gothic churches and mental asylum for clues. Battle demonic spirits to save your soul and uncover the shocking revelations about who is responsible for your death.

Weird asf, only \$2.. More games like this Different Story Lines Great Game Loved it so much need More. A pretty good detective game with pretty good story. Not too long aswell. Great gameplay and decent graphics for that time. Get it on sale for sure!. Even though the gameplay is so-so, but I enjoy the story, keeps making me wonder about the truth and it finishes with a great ending.. Well, what to say....

It was a very short game in which you're the worst ghost detective ever which, considering your police department had the most useless cops ever, makes you the only one capable of finding this killer.

The story was very short and, even then, you wish it was even shorter, with all the horrible "investigations" who lead you to figure out that someone died cause they died or something equally as bad.

To top it all off, unskippable credits.

But I guess if you want to try it, wait for it to be HEAVILY discounted (as in maybe 2 bucks at most).

In summary:

Story: 5/10 (If it wasn't slowed down so much by the "game" inbetween, it would be decent and slightly engaging, even though extremely predictable from the moment you realize the town in which you live)

Gameplay: 2/10 (Which is basically a tedious collection of either useless clues out of which you'll only use 3 at most, or an endless amount of collectibles placed randomly to try and make you explore the map, or the rare "combat" which is based on one of the least engaging mechanics I've ever seen in a game)

If you want challenging combat, difficult detective cases, or long and meaningful sidequests, you might want to give this game a miss.

However, if you're looking for a game with stunning atmosphere and an interesting plot, I would recommend it.

Overall, I enjoyed it, but I suspect it would work better as a film.
